

Investment Management in Turbulent Markets

FSAP Fall Wellness Events - 2006

Feel the Financial Freedom!

The economy is doing well; is it? We should buy some stocks, no, maybe some bonds; should we? Seems like we are financially confused! 🤔

Well, let us join Dr. William Droms who has graciously agreed to resolve our confusion and give us a quick insight into investments. Whether you have never invested before or have concerns about your current investments, this discussion will prove beneficial to you. Dr. Droms' financial expertise requires no marketing from us; he has carved his reputation through authorship of several books, and connection to the corporate sector. We have also been told on good measure that his expertise is encased in his unique style and humor. If his handouts are anything to go by we assure you, most likely you will leave this presentation tickled! 😄

Let us make a good investment at lunch time - 12:00 Noon on Thursday, October 26 at the Leavey Program Room. You are welcome to bring your lunch and no registration necessary.
